Are you interested in current marine science research? Would you like to bring hands-on marine science activities into your classroom? Join this continuing program and …

- Immerse yourself in a 5-day course on Monterey Bay
- Learn the latest research on some remarkable marine organisms
- Consider the future impacts of our changing oceans
- Work with local experts in marine research, environmental monitoring, and data analysis
- Experience meaningful outdoor field activities
- Receive inquiry-based lessons aligned with California State and Ocean Literacy standards
- Incorporate comprehensive lecture, lab, computer, and field activities into your core science classes
- Have access to researchers that can visit your classroom and bring cool "stuff" during the school year
- Earn continuing education units
- Earn a stipend
